2. APPLICATION:

There are 3 motors inside of the vacuum cleaner. With high power, powerful suction and minimum noise, it is widely applied in shops; airports; exhibition halls; conference rooms and various public occasions. Controlled respectively by two switches, the two motors can be operated simultaneously or separately. That brings a great convenience to the user who can choose to start any number of motors so suit the occasion. The product is reasonably designed to save energy for household applications.

3. SPECIFICATION:

Model No. : **3238W**
Voltage : 220V-240V 50/60 Hz
Power: 3600 W
Stainless tank capacity : 77 L

4. CAUTION:

1). The voltage of the your power supply must be consistent with that specified in the instructions (as fig.1)
2). After each use, hold the power plug and pull it out from the power socket. Do not use force on the cord (as fig. 2)

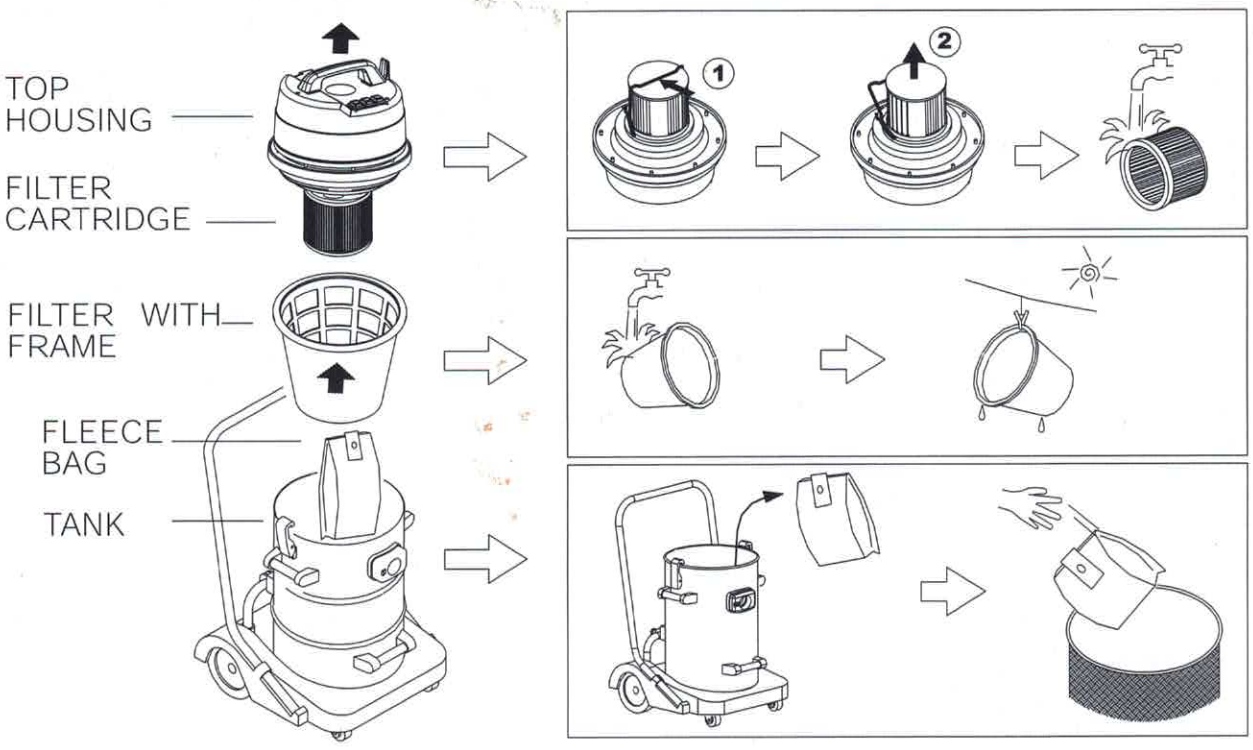
8. MAINTENANCE AND SERVICING:

To dismantle, unclip both latches and remove top housing and Filter with frame.

Wash filter cartridge and fabric filter with clean water after operation.

When fleece bag is full, please remove it out, then insert a new bag for next use.

P.S. fleece bag is for dry use, such as for collecting dust ; powder etc., please note.



Replace the filter and top housing and fasten latches.

REFER TO WATER LEVER SAFETY DEVICE

When the water level in the tank exceeds the safety level, the safety device will automatically block the inlet and motor turning sound will be changed, but power will remain ON, please switch off the power before pouring out the water in the tank.

REFER TO THE ACTION SOUND

This cleaner is designed with a powerful suction. Do not be alarmed if the motor noise increases when performing tougher cleaning work.
